# SHAFTALIGN® OS3

## Standard features

- ▶ OS3 sensor with HD XL detector and high precision MEMS inclinometer
- ▶ Computer version with integrated rechargeable battery
- ▶ Automatic measurement data transmission via wireless Bluetooth® module
- ▶ Alignment of horizontal, vertical and flange-mounted machines
- ▶ Alignment of coupled, uncoupled and nonrotatable shafts
- ▶ Automatic measurement with Active clock
- ▶ Soft foot check – measure, correct and save results
- ▶ Fixed feet selection – resolves base-bound and bolt-bound problems
- ▶ Automatic evaluation of alignment condition with TolChek®
- ▶ InfiniRange® extends detector measurement range to handle gross misalignment
- ▶ Flip machines functionality to swap the position of the machines e.g. motor and pump
- ▶ Static measurement mode – requires any 3 of the 8 available 45° measurement positions
- ▶ Live monitoring of horizontal and vertical machine corrections
- ▶ Save measurement reports as PDF to a USB memory stick
- ▶ Data protection – auto save and resume capability
- ▶ Save up to 200 measurement files in the device

Alignment results  
in 3 steps:

- ▶ Enter dimensions
- ▶ Rotate shafts
- ▶ Display measurement result

All alignment results are shown in one screen. A smiley and LED clearly display the alignment status evaluation.

## Bluetooth® communication

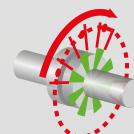

The wireless module enables data transmission between the measurement sensor and the SHAFTALIGN computer as well as the alignment app.

## Powerful options

- ▶ Continuous SWEEP measurement mode in combination with results table and pipe strain
- ▶ Ability to enter targets and thermal growth values
- ▶ Multipoint mode – measurement at any 3 or more positions over 60° rotation or more
- ▶ Alignment of cardan and spacer shafts
- ▶ User-defined tolerances
- ▶ ALIGNMENT CENTER software to manage measurement files and create reports

## Active clock measurement mode

Intelligent and precise alignment due to the activated MEMS inclinometer used in this measurement mode. Measurement can be taken at any 3 (or 4) positions and the sensor angular position is automatically considered.

TolChek®

For industrial use
